
**Carbon Neutrality**: Haitong International aims to achieve Carbon Neutrality by end of 2025. To achieve this, the following efforts will be put into practice:

- We will gradually lower our carbon emissions through reducing energy consumption and utilizing renewable energy. Carbon credits will be purchased to offset our remaining carbon emissions to achieve Net Zero Carbon Emissions by 2025;

- We will advocate the “Reduce, Reuse, Recycle” concept throughout the Group. We aim to power our operations by 100% renewable energy by end of 2025, reduce the annual paper consumption and waste generation per capita by at least 30% by end of 2025 (compared to end of 2020). We encourage replacing high carbon emitting business activities such as business trips and bulk printing by alternatives.

- Starting from 2020, we will measure our greenhouse gas emission metrics in line with the ISO 14064 standard annually and disclose the data in our annual ESG report.

**Sustainable Finance**: Haitong International aims to deploy or provide USD 20 billion in ESG and sustainable financing and investment by end of 2025. To achieve this, the following efforts will be put into practice:

- We will establish a firm-wide incentive system encouraging staff to devote efforts towards green financing and sustainable businesses (e.g. green bonds and ESG-themed financial products).

- We will include ESG risk assessment in our investment decision-making process, and gradually turn away from high polluting and high energy-wasting corporate financing and investment activities. We will proactively support the development of renewable and clean energy, environmental protection and green industries.

- We have set up the ESG Committee and ESG Executive Office under the Group’s Executive Committee to manage the Company’s ESG development and direct the implementation of the above ESG strategies throughout the group’s global operations.

In the future, Haitong International will continue to create positive environmental and social values through each of its businesses and decisions. Capitalizing on our unique capital intermediary role in investment, financing, consultancy, research and brokerage, Haitong International is capable of bringing “Impact Investment” into play and strives to become a world leading IB with a clear focus on sustainable finance.
